SUMMARY

Full Stack Web Developer with 5 years of experience designing, building, and deploying scalable web and mobile applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in front-end architecture with React.js, Next.js, and TypeScript, and back-end development with Node.js, Express.js, RESTful APIs, and GraphQL. Experienced across the full Software Development Life Cycle (SDLC), including UI/UX implementation, API design and integration, database management, cloud deployment on AWS, CI/CD automation, and automated testing. Proven record of improving application performance, delivering measurable business impact, and mentoring developers in Agile teams. Proficient with AI-assisted development tools including GitHub Copilot and Cursor IDE to accelerate delivery and improve code quality.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, PostgreSQL

Front-End Development: React.js (v18), Next.js (v14), React Native, Angular, Redux, Zustand, React Router, Tailwind CSS, Bootstrap, SASS, NativeBase, Responsive Web Design, Server-Side Rendering (SSR), Static Site Generation (SSG)

Back-End Development: Node.js, Express.js, RESTful API Design, GraphQL, API Integration, Microservices Architecture

Databases: MongoDB, SQL, Relational Databases, Redis, Database Design

Cloud and DevOps: AWS (Amazon Web Services), CI/CD Pipelines, Jenkins, Webpack, Docker, Cloud Infrastructure Management, Deployment Automation

Testing and QA: Jest, Enzyme, Mocha, Jasmine, Karma, Automated Testing, Unit Testing

Tools and Collaboration: Git, GitHub, VS Code, Figma, JIRA, Trello, Agile/Scrum Methodology, Code Review

AI-Assisted Development: GitHub Copilot, Cursor IDE

Core Competencies: Scalable Web Architecture, Full Stack Development, Performance Optimization, State Management, API Design and Integration, Cross-Platform Mobile Development, Technical Leadership, Mentoring

EXPERIENCE

Senior Software Engineer | Angular Minds | Pune, India

December 2021 - Present

- Lead front-end and full stack development for enterprise web applications using React 18, Next.js 14, Node.js, GraphQL, and TypeScript, delivering scalable and high-performance digital experiences.
- Design and implement reusable UI architectures, design systems, and component libraries using Tailwind CSS and Zustand, improving development efficiency and consistency across teams.
- Optimize application performance through Server-Side Rendering (SSR), Static Site Generation (SSG), caching strategies, and CDN integration, improving user experience and platform scalability.
- Develop and integrate real-time data solutions using GraphQL and REST APIs, ensuring high availability, robust error handling, and seamless user interactions.
- Collaborate with Product Owners, UX designers, and back-end engineers in Agile environments, driving architecture decisions, conducting code reviews, and mentoring developers.
- Adopt AI-assisted development tools (GitHub Copilot, Cursor IDE) to accelerate delivery timelines and improve code quality.

Key Achievements:

- Improved Largest Contentful Paint (LCP) by 35% and reduced mobile Time-to-Interactive through SSR, SSG, caching, and front-end performance optimization.
- Built a scalable design system with 30+ reusable UI components, reducing duplicate development effort by 40% and achieving 99.9% platform availability.

- Increased sprint productivity by 25% through adoption of AI-powered development tools.

Software Engineer | NxtWave Disruptive Technologies

December 2020 - December 2021

- Contributed to development projects that improved customer solutions and enhanced user engagement through systematic web application development and API integrations.

PROJECTS

UMG Royalty Portal | Universal Music Group (via Brillio) | May 2024 - June 2026

Technologies: Next.js, React.js, GraphQL, Tailwind CSS, Zustand

- Developed and enhanced a large-scale royalty management platform enabling seamless artist and rights-holder access to royalty data, handling processing for 500+ rights-holders with a 20% improvement in page load speeds.
- Improved application performance through SSR/SSG optimization and implemented a scalable, reusable design system.

Co-Commerce Platform | January 2023 - March 2024

Technologies: React.js, Node.js, MongoDB, REST APIs

- Engineered a multi-vendor eCommerce platform supporting 10,000+ SKUs and multi-currency transactions.
- Built a recommendation engine that increased average order value (AOV) by 18% through data-driven personalization.
- Developed merchant management tools that reduced operational errors by 30%.

E-Sign Portal | March 2021 - December 2022

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed a secure, role-based e-signature platform supporting document creation, e-sign workflows, template management, and subscription billing.
- Implemented automated email notifications and improved digital document processing, reducing manual paperwork processing time by 30% through automated workflow triggers.

Online Skills Assessment Platform | December 2021 - January 2022

Technologies: React Native, NativeBase

- Built a multi-tenant EdTech SaaS platform enabling assessment management, subscription administration, and cross-platform mobile access.
- Achieved a post-release defect rate below 2% through automated testing and quality assurance practices.

EDUCATION

Master of Computer Applications (MCA)

SRM Institute of Science and Technology, Tamil Nadu, India

Bachelor of Science, Computer Science

Acharya Nagarjuna University, Guntur, Andhra Pradesh, India

CERTIFICATIONS

- Google AI - Google | April 2026
- Databases and SQL for Data Science (Python) - IBM | April 2024
- Deploy on AWS - HCL GUVI | May 2023

ADDITIONAL INFORMATION

Languages Known: English, Telugu, Hindi
